Summary

I have been a Python developer for the last 2 years. My main goal is to fully understand the client's tasks and bring them to life. I use the best ways in web development and try to keep up to date with all web industry innovations.

Besides, I have a bachelor's degree in Data Science from the University of Karachi and, I graduated in the "Web development by javascript and python" course from Harvard University. Creative skills make me more confident in this project.

I am adequate in prominent skills like Python, Django, Flask, Html, CSS & JavaScript, JQuery, Ajax, API development, SQLite, Mysql, Postgresql, MongoDB, and different web hosting sectors, and so on. I am passionate about websites and back-end coding. I like to play with codes and results in the best output from my work.
